PROFILE

Full-Stack Developer with expertise in React.js, React Native, Express, and MongoDB, specializing in building scalable, high-performance web and mobile applications. Proficient in TypeScript and JavaScript, with strong experience in developing RESTful APIs, integrating WebSockets for real-time features, and working with both SQL (MySQL) and NoSQL (MongoDB) databases. Focused on delivering seamless user experiences and optimized application performance across the stack.

EMPLOYMENT HISTORY

Frontend Developer at Simplicitylabs Pvt. Ltd, Gurgaon

Jun 2024 — Present

1. Transparency

- Worked on *Transparency*, a fraud prevention, transparency, and traceability platform within the A2P (Application-to-Person) messaging ecosystem.
- Developed the frontend for five different panels using React, implementing key modules such as **Dashboard, User Management, Reporting, Support Ticket, URL Mapping, and Registration.**
- Integrated **Django backend APIs** and contributed to backend development for different modules like reporting section, notification feature.
- Built **reusable components**, optimized **performance**, and enhanced **UI consistency and maintainability.**
- **Tech Stack:** React, JavaScript, React-Table, Day.js, Moment.js, ApexCharts, Ant Design (AntD), Django, REST APIs

2. Payairo Payment SDK & Merchant Panel

- Designed and developed the merchant panel for Payairo, empowering merchants to manage transactions and track sales.
- Created a payment SDK for easy integration of Payairo as a payment gateway with secure access key implementation.
- Integrated backend APIs and third-party services for KYB verification and bank account linking, ensuring a seamless and secure merchant onboarding experience.
- **Tech Stack:** React, Redux, JavaScript, HTML5, CSS3, REST APIs, Third-Party Services (KYB, Bank Account Integration)

Project Link: <https://merchant.payairo.com/>

3. NFT Marketplace (EcoTrader)

- Developed and optimized the frontend for EcoTrader, an NFT marketplace enabling users to trade, buy, and sell NFTs.
- Integrated Web3 wallet authentication (e.g., MetaMask) for secure user login and transactions.
- Collaborated with backend APIs and smart contracts to handle blockchain transactions and deliver real-time market updates.
- **Tech Stack:** React, Redux, JavaScript, Web3.js, HTML5, CSS3, REST APIs, Smart Contracts
